

## **LSA International Product care**

We suggest treating all handmade glass with care to keep it free from knocks, chips and scratches and recommend the following care instructions:

- hand washing the glass in warm, soapy water and drying with a soft cloth
- avoid the use of any abrasive detergents or materials when cleaning and drying the glass
- unlike toughened glass, soda glass is not heat proof so please do not:
  - heat to excessive temperatures
  - heat or cool too quickly for the avoidance of thermal shock
- handpainted products, in particular those with metallic paints, should be washed and dried with particular care
- do not put glass in the microwave

A range of our glass items are dishwasher safe. Our dishwasher safe guidelines are subject to testing under the following conditions:

- dishwasher run on a cool cycle
- a mild detergent is used
- tested for up to 25 washes
